What is a key objective to performing continuous replication?

- A. Avoid performing data archiving.
- B. Reduce the RPO to near-zero.
- C. Reduce the deduplication ratio.
- D. Avoid performing data backups.

Answer: B

Which Dell EMC product creates a server and IP-based SAN from direct-attached server storage to deliver flexible and scalable performance and capacity on demand?

- A. PowerMax
- B. VxFlex OS
- C. ViPR Controller
- D. XtremIO

Answer: B

What is an accurate statement about stretched VLANs?

- A. Reduces network bandwidth requirements during VM migration across sites.
- B. Requires a change in the VMs' IP addresses to match the addressing scheme at the other sites.
- C. Enables automatic modification of VLAN addresses during VM migration across sites.
- D. Supports migration of VMs across sites without the need to change their network configurations.

Answer: A

What is a key advantage of implementing FCIP?

○ A. Provides a disaster recovery solution by replicating data across data centers.

○ B. Enables migration of VMs across data centers by using existing FC networks.

○ C. Ensures lossless transmission of FC traffic across data centers over Ethernet.

○ D. Provides a dedicated network for transmission of storage traffic within a data center.

Answer: A

What accurately describes the scale-out storage architecture?

○ A. Scales the capacity only within a single storage system.

○ B. Provides a fixed capacity ceiling that limits scalability beyond a storage system.

○ C. Provides the capability to maximize its capacity by adding nodes to the cluster.

○ D. Restricts scalability to the limits of the storage controllers.

Answer: C
